

**AERO-NC D**

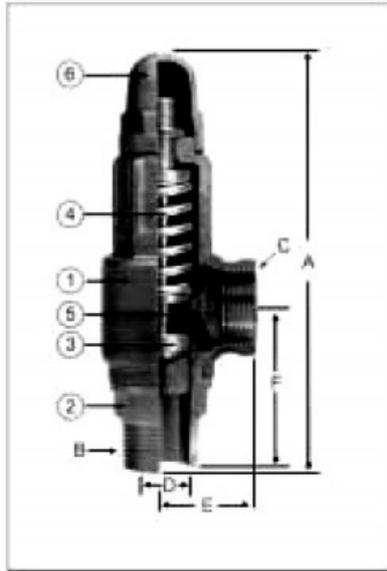

# BRONZE SAFETY RELIEF VALVE

## Sealing

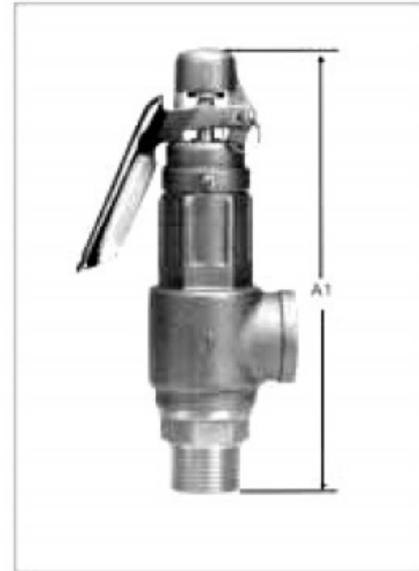

**A3W (Inlet threading)**  
1/2" – 2"

## Lever

**A3WL (Inlet threading)**  
1/2" – 2"

Temp : -45C – 185C		
Type	Size	Set Pressure
Without Level		
A3W-04	1/2"	1 40 Bar
A3W-06	3/4"	
A3W-10	1"	
A3W-12	1 1/4"	
A3W-15	1 1/2"	
A3W-20	2"	
With Level		
A3WL-04	1/2"	1 40 Bar
A3WL-06	3/4"	
A3WL-10	1"	
A3WL-12	1 1/4"	
A3WL-15	1 1/2"	
A3WL-20	2"	

## Dimensions

## General Material

NO	Type	A3W Sealing	A3WL Lever
1	Valve body	Cast bronze	Cast bronze
2	Valve seat	Forging brass	Forging brass
3	Disc	Forging brass	Forging brass
4	Spring	Steel	Steel
5	Stem	Brass	Brass
6	Cap	Forging brass	Cast bronze
Working pressure		1 - 40 Bar	
Working temp.		-45°C ~ 185°C	
Working fluid		Noncorrosive Gas · Noncorrosive Liquid · Steam	

\*Varies setting working pressure is made to order within one day if set spring ex-stock otherwise require 7-15 days lead time

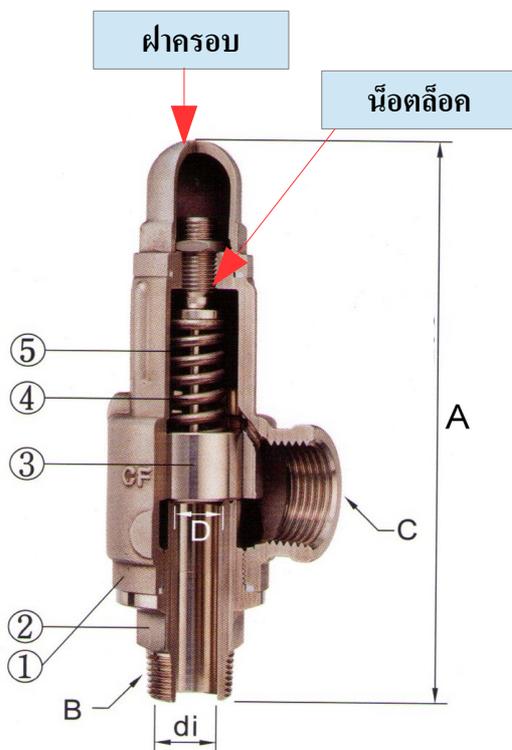

# MAINTENANCE OF SAFETY VALVES

- (1) Visual Checking: carry out visual checking of equipment during operation
- (2) Check the valve body for corrosion or cracks.
- (3) Check changes of temperature under normal operation pressure.
- (4) Check if set pressure or blow out pressure are the same as those valves on the name plate.
- (5) Check fixing sections for any leaking sound.
- (6) Check open/close position of the main valve.
- (7) Check for any abnormal vibration.
- (8) Carry out periodical inspection every six months.

## INSTALLATION AND INSTRUCTION

- (1) Install it in a place which allows an easy access for maintenance and checking.
- (2) Install it in a place or direction so as to avoid danger to workers.
- (3) Make the inner diameter larger than the inlet side bore of the safety valve.
- (4) Install it vertically against the ground.
- (5) Keep it clean at all times since foreign matters like dust or scale may prevent proper operation.
- (6) When installing a screwed-in type safety valve, be sure to adjust at the hexagonal section or chamfered section.

## วิธีตั้งแรงดันเซฟตี้วาล์ว

1. คลายฝาครอบออก
2. ขันน็อตล็อกออกให้หลวม
3. ขันแกนตั้ง
  - 3.1 ขันเข้าตามเข็มนาฬิกาตั้งแรงดันสูงขึ้น
  - 3.2 ขันออกทวนเข็มนาฬิกาตั้งแรงดันต่ำลง
4. เมื่อตั้งเสร็จแล้วให้ขันน็อตล็อกให้แน่น
